

Connect in seconds

Desktop app. QR code.
ChatGPT on your phone.

That's it. You're **connected**.

What can it do?

Pretty much anything your computer can access.

The central smartphone screen shows the Codex interface with the following tasks:

- What should we get done?
- Message Sarah: "I'll send the deck shortly."
- Schedule video Friday 4:00 PM
- Run research agent Summarize latest AI papers
- Pull sales data Q1 report
- Organize files Project Phoenix

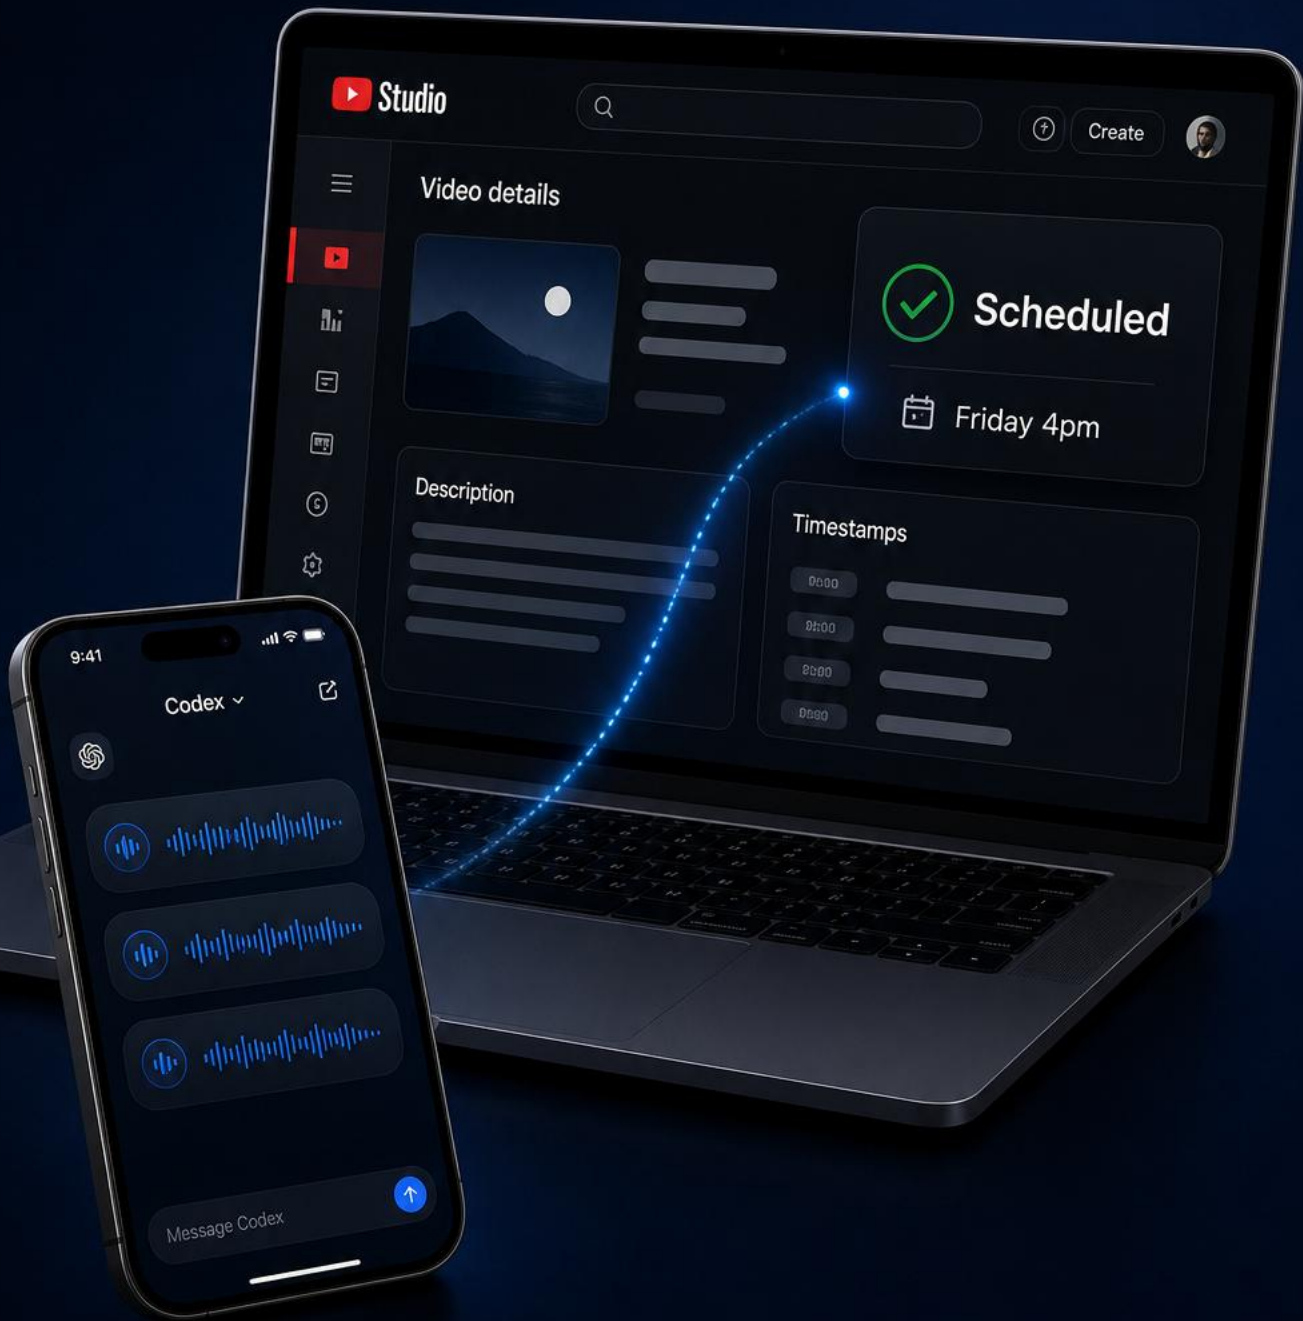

Surrounding windows include:

- Messaging App:** Conversation with Sarah. Messages: "I'll send the deck shortly." (Delivered), "Perfect, thanks!"
- YouTube Studio:** Schedule video interface. Video: Launch Update. Date: May 17, 2024. Time: 4:00 PM. Button: Schedule
- AI Research Agent:** Workflow diagram: Search papers → Extract insights → Summarize → Deliver report
- Sales Data — Q1 2024:** Table with columns: Region, Revenue, Growth, Customers
- Project Phoenix:** File explorer showing folders: Briefs, Assets, Research and files: Roadmap.pdf, Timeline.xlsx

Sales Data — Q1 2024			
Region	Revenue	Growth	Customers
North America	\$2.45M	+18%	1,243
Europe	\$1.89M	+14%	987
Asia Pacific	\$2.31M	+22%	1,156
Total	\$6.65M	+18%	3,386

Final proof

The video is scheduled from your phone.

Three voice prompts.
I never touched the computer.
